LOOKINGGLASS

ON-DEMAND INVESTIGATION & ANALYSIS™

Augment Your Security Team with LookingGlass™ Expertise

Addressing Your Needs

Investigative Specialists & Expert Analysis

- Quickly and efficiently find information on security issues including both physical (i.e., demonstrations and protests) and digital threats.
- Analyst expertise in the fields of cyber intelligence, intelligence studies, and behavioral science.
- Focus on your core business processes and eliminate the need for in-house staff to spend valuable time on manual reviews of thousands of websites and social media platforms.

Global Coverage

- Expand the depth and breadth of your coverage with analysts that apply their cultural and foreign language skills to help you understand threats across the globe, providing deep-dive analysis of persons of interest, cyber threats, and more.

Geopolitical Intelligence

- Keep international businesses safe with Country Assessments for specific geographic areas and regions.

Open Source Intelligence Database

- Identify potential online vulnerabilities to help stakeholders better understand corporate and executive risks using LookingGlass' open source intelligence and threat actors database.

The LookingGlass On-Demand Investigation and Analysis team is a group of highly-skilled cyber intelligence analysts that conduct web-based searches, investigations, and other analyses, quickly, efficiently, and with the highest level of discretion.

Having an expert analyst examine and interpret your data for trends and recommendations will better inform your team about emerging threats and impending cyber attacks.

Choose The Package That Meets Your Needs

Leverage a full- or half-time analyst to work in conjunction with your own security and investigative staff, or to augment your overall security posture with flexible support packages. It is now easy to add LookingGlass' security expertise to your team — when you need it most.

LookingGlass On-Demand Investigation and Analysis packages give you the flexibility to have any of the following requests fulfilled by our expert team — with the option to purchase support packages as a bundle, or per pay usage.

Request	Service Descriptions
Delivered Incident Investigation	Investigate and provide additional context to an alert or a delivered incident from LookingGlass
Online Executive Threat Assessment	Vulnerability assessment of an executive, their spouse, and children evaluating the executive's public footprint in the open and Dark Web
Client or Third Party Attack Surface	Assessment of client's cybersecurity posture or third party that evaluates evidence of system compromise, compromised account credentials, vulnerabilities in externally facing applications, spear-phishing risk, and online indication and warnings
Person of Interest Investigation	Investigation into a POI (internal or external) that attempts to establish the real identity and future actions of a poster, a threat agent, or other individual of interest
Malware/File Analysis	Reverse engineering of a suspicious malware sample or file, obtaining Indicators Of Compromise (IOCs), linking to possible author, campaign, and/or malware family
Threat Actor Profile Research	Research and analysis of a bad actor's Tactics, Techniques, and Procedures (TTPs), links to any campaigns, investigation into motivation, group affiliations, and online presence
Campaign/Breach Research	Attempts to establish attribution, malware campaign tracking, attack scope determination, size, who's affected, and who has the wild data
Domain Investigation/Analysis	Investigation and analysis of suspicious domains or IP addresses for any malicious activities, links to known campaigns or threat actors, or past threat activity
Event/Pre-event Security Briefing	A formal report detailing the risks and vulnerabilities associated with an event of interest
Due Dilligence/Company of Interest Investigation	Investigation into a business of interest to include legal risks, regulatory compliance matters and sanctions review, reputation risks, and executives profile review
Travel Advisory	A formal report detailing physical, cyber, and geopolitical risks associated with a designated geographic region or county/location of interest

ABOUT LOOKINGGLASS
CYBER SOLUTIONS

LookingGlass Cyber Solutions delivers unified threat protection against sophisticated cyber attacks to global enterprises and government agencies by operationalizing threat intelligence across its end-to-end portfolio. Scalable threat intelligence platforms and network-based threat response products consume our machine-readable data feeds to provide comprehensive threat-driven security. Augmenting the solutions portfolio is a worldwide team of security analysts who continuously enrich our data feeds and provide customers unprecedented understanding and response capability into cyber, physical, and third party risks. Prioritized, relevant, and timely insights enable customers to take action on threat intelligence across the different stages of the attack life cycle.
